### Download APP

**Please download APP on your mobile before use the product**

- 1、 IOS: Download “2CU” from APP Store
- 2、 Android: Download “2CU” from [www.2cu.co](http://www.2cu.co) or Google Play store.

**Note: For the first time to start "2CU" APP. Users need to register an account as follows:**

Using Mobile to register :

1. Start "2cu" program, "Register"
2. Select "By mobile" or by "email", go "next"
3. Input verify code (the code will send to your mobile by message), then "next"
4. Set one password and reconfirm the password. then click "Register"
5. Once register successful, it will access to the log-in interface. then you need input your ID and password, click "log in" then you can access to 2cu main Menu

Using Mobile to register: Use the same steps as above

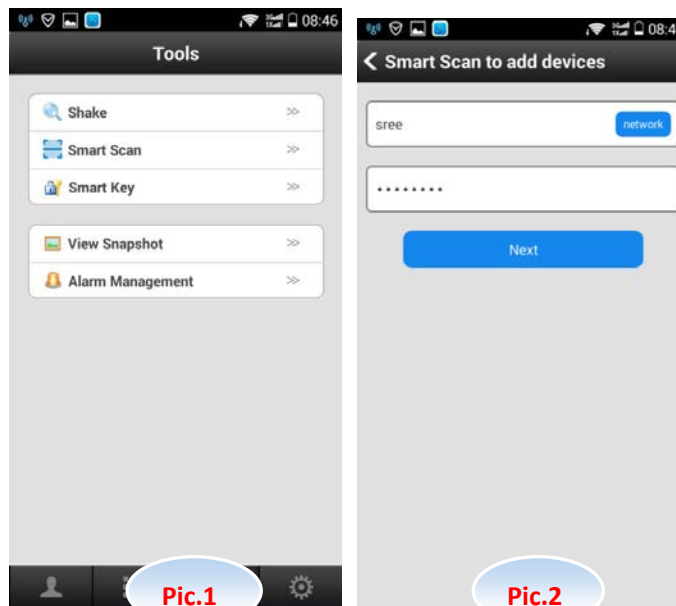

**Note: please keep the ID and password in a Safe place, as you may need the ID and password for future application on other mobile.**

## Network connection

QR Scan to active WI-FI as below :

- Power on camera , no need connect network cable
- Access 2cu , find "Tool " (Pic.1), and choose "Set Wifi by QR Code"
- Input the WI-FI password, then go "NEXT" (Pic.2). (App will choose the same WI-FI ID automatically as mobile). ( You can select other WI-FI, but if the mobile WI-FI ID is different from camera WI-FI ID, the APP will not possible to search all devices in this LAN)
- The 2cu APP will generate one QR code, point the QR code at the camera lens with in distance of 20-30cm. Make sure not moving the mobile and holding still for a while (Pic.3).
- Once heard a beep sound, means the camera find the WI-FI, and then click "Heard" button on bottom of screen (pic.3). Waiting WI-FI connection (Pic.4). If WI-FI connects successfully, it will pop out "Aha SETUP successfully"(Pic.5). If password is not correct, the camera will have sound "Bee Bee Bee". You need input the correct WI-FI password again.

**Note: This is only for the first time connecting with WI-FI. Once device has been connected with WI-FI, "Connect by QR" will not be allowed to use again. You need to RESET the camera, in order to use this function (Holding power button for 5 seconds)**
